

RESTORE NATURE IN YOUR NEIGHBOURHOOD

Free Pollinator Plants

In September and October, WWF-Canada, along with various local collaborators, is participating in a series of neighbourhood events to help communities restore wildlife habitat in parts of West Toronto.

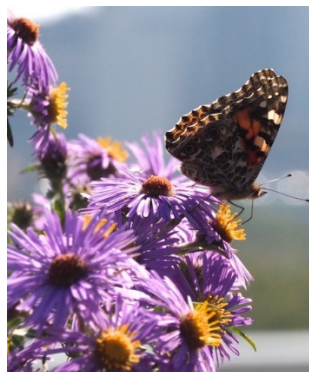

You can help grow Canada's biggest wildlife garden!

Turn your backyard, front yard or balcony into a beautiful sanctuary for birds, bees and butterflies while helping to restore biodiversity in your community.

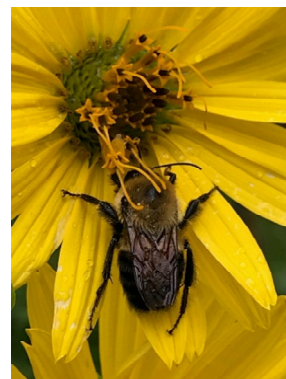

- Free, locally-sourced native plants (first come, first served)
- Advice from local experts on how to make your native-plant garden flourish
- Meet neighbours and share native plant tips and tricks
- Learn more about native plants and the pollinators and other wildlife they attract (visit: www.inthezonegardens.ca)
